Publication Information: Discrete Mathematics (ISSN 0012-365X). For 2002 volumes 242–257 are scheduled for publication. A combined subscription to Discrete Mathematics and Discrete Applied Mathematics (Vols. 116–124) at reduced rate is available. Subscription prices are available upon request from the Publisher or from the Regional Sales Office nearest you or from this journal's website (http://www.elsevier.nl/locate/disc). Further information is available on this journal and other Elsevier Science products through Elsevier's website (http://www.elsevier.nl). Subscriptions are accepted on a prepaid basis only and are entered on a calendar year basis. Issues are sent by standard mail (surface within Europe, air delivery outside Europe). Priority rates are available upon request. Claims for missing issues should be made within six months of the date of dispatch.
Orders, claims, and product enquiries: please contact the Customer Support Department at the Regional Sales Office nearest you:
New York: Elsevier Science, PO Box 945, New York, NY 10159-0945, USA; phone: (+1) (212) 633 3730 [toll free number for North American customers: 1-888-4ES-INFO (437-4636)]; fax: (+1) (212) 633 3680; e-mail: usinfo-f@elsevier.com
Amsterdam: Elsevier Science, PO Box 211, 1000 AE Amsterdam, The Netherlands; phone: (+31) 20 4853757; fax: (+31) 20 4853432; e-mail: nlinfo-f@elsevier.nl
Tokyo: Elsevier Science, 9–15 Higashi-Azabu 1-chome, Minato-ku, Tokyo 106-0044, Japan; phone: (+81) (3) 5561 5033; fax: (+81) (3) 5561 5047; e-mail: info@elsevier.co.jp
Singapore: Elsevier Science, No. 1 Temasek Avenue, #17-01 Millenia Tower, Singapore 039192; phone: (+65) 434 3727; fax: (+65) 337 2230; e-mail: asiainfo@elsevier.com.sg
Rio de Janeiro: Elsevier Science, Rua Sete de Setembro 111/16 Andar, 20050-002 Centro, Rio de Janeiro – RJ, Brazil; Phone: (+55) (21) 509 5340; fax: (+55) (21) 507 1991; e-mail: elsevier@campus.com.br [Note (Latin America): for orders, claims and help desk information, please contact the Regional Sales Office in New York as listed above]

USA mailing notice: Discrete Mathematics (ISSN 0012-365X) is published (total 16 issues) by Elsevier Science B.V. (P.O. Box 211, 1000 AE Amsterdam, The Netherlands). Annual subscription price in the USA US$4217.00 (valid in North, Central and South America), including air speed delivery. Periodical postage rate paid at Jamaica, NY 11431.
USA POSTMASTER: Send address changes to Discrete Mathematics. Publications Expediting Inc., 200 Meacham Ave, Elmont, NY 11003.
AIRFREIGHT AND MAILING in the USA by Publications Expediting Inc., 200 Meacham Avenue, Elmont, NY 11003.

ELSEVIER, Amsterdam–London–New York–Oxford–Paris–Shannon–Tokyo

© 2002, Elsevier Science B.V. All rights reserved

This journal and the individual contributions contained in it are protected under copyright by Elsevier Science B.V., and the following terms and conditions apply to their use:

Photocopying

Single photocopies of single articles may be made for personal use as allowed by national copyright laws. Permission of the publisher and payment of a fee is required for all other photocopying, including multiple or systematic copying, copying for advertising or promotional purposes, resale, and all forms of document delivery. Special rates are available for educational institutions that wish to make photocopies for non-profit educational classroom use.

Permissions may be sought directly from Elsevier Science via their homepage (http://www.elsevier.com) by selecting "Customer support" and then "Permissions". Alternatively you can send an e-mail to: permissions@elsevier.co.uk, or fax to: (+44) 1865 853333.

In the USA, users may clear permissions and make payments through the Copyright Clearance Center, Inc., 222 Rosewood Drive, Danvers, MA 01923, USA; phone: (978) 7508400, fax: (978) 7504744, and in the UK through the Copyright Licensing Agency Rapid Clearance Service (CLARCS), 90 Tottenham Court Road, London W1P 0LP, UK; phone: (+44) 20 7631 5555; fax: (+44) 20 7631 5500. Other countries may have a local reprographic rights agency for payments.

Derivative Works

Subscribers may reproduce tables of contents or prepare lists of articles including abstracts for internal circulation within their institutions. Permission of the publisher is required for resale or distribution outside the institution.

Permission of the publisher is required for all other derivative works, including compilations and translations.

Electronic Storage or Usage

Permission of the publisher is required to store electronically any material contained in this journal, including any article or part of an article.

Except as outlined above, no part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without prior written permission of the publisher.

Address permissions requests to: Elsevier Science Global Rights Department, at the mail, fax and e-mail addresses noted above.

Notice

No responsibility is assumed by the Publisher for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein. Because of rapid advances in the medical sciences, in particular, independent verification of diagnoses and drug dosages should be made.

Although all advertising material is expected to conform to ethical (medical) standards, inclusion in this publication does not constitute a guarantee or endorsement of the quality or value of such product or of the claims made of it by its manufacturer.

Author enquiries

For enquiries relating to the submission of articles (including electronic submission where available) please visit the Author Gateway from Elsevier Science at http://authors.elsevier.com. The Author Gateway also provides the facility to track accepted articles and set up e-mail alerts to inform you of when an article's status has changed, as well as detailed artwork guidelines, copyright information, frequently asked questions and more.

Contact details for questions arising after acceptance of an article, especially those relating to proofs, are provided when an article is accepted for publication.

Abstracted/Indexed in: ACM Computing Reviews, Anbar Electronic Intelligence, Cambridge Scientific Abstracts, Current Contents: Physical, Chemical & Earth Sciences, International Abstracts in Operations Research, Mathematical Reviews, PASCAL, Science Citation Index, Zentralblatt für Mathematik.

⊙ The paper used in this publication meets the requirements of ANSI/NISO Z39.48-1992 (Permanence of Paper).

List of referees: volumes 241–250

DISCRETE MATHEMATICS has continuously benefitted from the kind assistance of a great number of referees. We hereby express our gratitude for their sustained efforts, without which our activity could not have been carried out.

Scope of the Journal

The aim of this journal is to bring together research papers in different areas of discrete mathematics. Contributions presented to the journal can be research papers, short notes, surveys, and possibly research problems. The 'Communications' section will be devoted to the fastest possible publication of the brief outlines of recent research results, the detailed presentation of which might be submitted for possible publication in DISC or elsewhere. The journal will also publish a limited number of book announcements, as well as proceedings of conferences. The journal will publish papers in combinatorial mathematics and related areas. In particular, graph and hypergraph theory, network theory, coding theory, block designs, lattice theory, the theory of partially ordered sets, combinatorial geometrics, matroid theory, external sets theory, logic and automata, matrices, polyhedra, discrete probability theory, etc. shall be among the fields covered by the journal.

Guide for Authors

General

Submission of your manuscript is welcome provided that it, or any translation of it has not been copyrighted or published is not being submitted for publication elsewhere. Upon acceptance of an article, the author(s) will be asked to transfer copyright of the article to the Publisher. This transfer will ensure the widest possible dissemination of information. Manuscripts should be prepared for publication in accordance with the instructions given in the "Guide to Authors" (available from the Publisher) details of which are given below.

Type of contributions

The journal welcomes the following types of contributions:

- Original research articles
- Review articles, providing a comprehensive review on a scientific topic
- Fast Communications: Short, self-contained articles on ongoing research, or reporting interesting possibly tentative ideas, or comments on previously published research.

To whom can I submit my manuscript?

Contributions should be written in English and sent in triplicate to:
Carolyn Sterner (Editorial Manager), RUTCOR-Rutgers, The State University of New Jersey, 640 Bartholomew Road, Piscataway, NJ 08854-8003, USA.

General Author Instructions (short version)

Each paper should be introduced by three to five keywords and a selfcontained abstract of no more than 100 words, not counting the formulas. Please make sure that the paper is submitted in its final form. Corrections in the proof stage other than printer's errors should be avoided: costs arising from such corrections will be charged to the authors.
Footnotes should be avoided if possible, but if they are included they should be brief numbered consecutively.
References should be listed alphabetically, as in the following examples: books [1], articles in journals [2], papers in a contributed volume [3,4], unpublished papers [5].

- [1] E. Borger, Computability, Complexity, Logic (North-Holland, Amsterdam, 1989).
- [2] D.E. Knuth, Theory and Practice, Theoret. Comput. Sci. 90 (1991) 1–15.
- [3] A.K. Lenstra and H.W. Lenstra, Jr., Algorithms in number theory, in: J. vanLeeuwen, ed., Handbook of Computer Science, Vol. A (Elsevier, Amsterdam, 1990) 673–715.
- [4] M. Li, Lower bounds by Kolmogorov complexity, in: Proc. ICALP '85, Lecture Notes in Computer Science, Vol. 194 (Springer, Berlin, 1985) 383–393.
- [5] A. Rajasekar, Semantics for logic programs, Ph.D. Thesis, Department of Computer Science, University of Maryland, 1989.

Figures should be provided in a form suitable for photographic reproduction and reduction. Lettering should be uniform of size corresponding to the anticipated reduction. Handwritten lettering on figures is not acceptable. Figures should be identified by arabic numerals and the captions should be typed, double-spaced, on a separate sheet rather than lettered on the figures themselves. Photographs and coloured pictures must be of impeccable quality. Please note that for colour photographs the publisher will charge the printing costs to the author. A final accepted manuscript can be submitted in paper only (typed on one side in double spacing with wide margins).

Electronic Submissions: LaTeX documents

Only the final accepted manuscript can be submitted on disk, along with two paper-printed copies which are identical to the file. Please label the disk with your name, and mention which word processor you have used. If the file is suitable, proofs will be produced without rekeying the text. The article should be encoded in ESP-LaTeX, standard LaTeX, or AMS-LaTeX (in document style "article"). The Elsevier-LaTeX package, together with instructions on how to prepare a file, is available from the Publisher. This package can also be obtained through Elsevier Science FTP-server, or using anonymous FTP from the Comprehensive TeX Archive Network (CTAN) at sites in the USA in the United Kingdom and in Germany.
Illustrative material (original figures or high-quality glossy prints, or photographs showing a sharp contrast) should be included separately. No changes from the accepted version are permissible, without the explicit approval by the Editors. The publisher reserves the right to decide whether to use the author's file or not. Authors should include an ASCII table (available from the Publisher) in their files to enable the detection of transmission errors.
For the purpose of further correspondence the manuscript should end with a complete mailing address, preferably including email address, of at least one of the authors.

Electronic submission: Non-LaTeX documents

Only the final accepted manuscript can be submitted on disk, along with two paper-printed copies which are identical to the file. Please label the disk with your name, and mention which word processor you have used.
The word-processed text should be in single column format. Keep the layout of the text as simple as possible; in particular, do not use the word-processor's options to justify the text or to hyphenate the words. The electronic text should be prepared in a way very similar to that of conventional manuscripts (see also Guide for Authors). The list of references, tables and figure legends should be compiled separately from the main text. Do not reserve space for the figures and tables in the text; instead, indicate their approximate locations, either directly in the electronic text or on the manuscript. The final text should be submitted both in manuscript form and on diskette or CD. Use standard 3.5″ or 5.25″ diskettes for this purpose. Both double density (DD) and high density (HD) diskettes are acceptable. It is recommended to store the main text, list of references, tables and figure legends in separate text files with clearly identifiable file names (for example, with extensions TXT, REF, TBL, FIG).
The format of the files depends on the word-processor used. Texts made with DEC WPS PLUS, DisplayWrite, First Choice, IBM Writing Assistant, Microsoft Word, Multimate, PFS: Write, Professional Writer, Samma Word, Sprint, Total Word, Volkswriter, Wang PC, WordMARC, WordPerfect, Wordstar, or files supplied in DCA.RFT format can be readily processed. In all other cases the preferred text format is ASCII.
Essential is that name and version of the word-processing program and the type of computer on which the text was prepared is clearly indicated on the diskette label or the accompanying checklist. The manuscript may contain parts (e.g. formulas or complex tables) or last-minute corrections which are not included in the text on diskette; however, if this is the case then the differences with the diskette version should be clearly marked on the manuscript.
Illustrative material (original figures or high-quality glossy prints, or photographs showing a sharp contrast) should be included separately.

Keyword Instructions

Important Notice: please add one to five keywords to your article.
Keywords are essential for the accessibility and retrievability of your article. Keywords assigned to articles will be assembled in a keyword index which will be printed in the last issue of each volume for each journal, and in cumulative indexes. In addition, it is planned to make keywords available on Internet. To maximize the consistency with which such keywords are assigned by different authors, the following guidelines have been drawn up.

- Each keyword (which can be a phrase of more than one word) should describe one single concept. Words like "and" or "of" should be avoided.
- Avoid very general keywords which become meaningless once in a keyword list, e.g "action", "computer", "mathematics". Check whether the keywords describe the outline of the article on the whole.
- Use natural language: for instance "automatic error recovery" rather than "error recovery, automatic".
- Try to use nouns and adjectives as much as possible (i.e. use "automatic error recovery" rather than "recovering errors automatically"). Do not use nouns in the plural form.
- Use English rather than American spelling (regardless of the spelling used for the article itself).
- Avoid the use of abbreviations as much as possible, unless an abbreviation is so well-established that the full term is rarely used (e.g. use "laser" instead of "Light Amplification by Stimulated Emission of Radiation", but use "computer aided design" instead of "CAD").

Although these guidelines are not mandatory, they should be adhered to where possible.
Papers submitted to Discrete Mathematics may also be posted on The Mathematics Preprint Server (http://www.mathpreprints.com). Posting on The Mathematics Preprint Server is in conformity with Elsevier Science copyright policy and in no way conflicts with submission to Discrete Mathematics.

Author Benefits

No page charge is due
50 offprints of each contribution free of charge
30% discount on all Elsevier Science books.
